

## Early Intervention project

### Summary of key messages from professionals

- We need to see new behaviour support services commissioned for children and young people:
  - Early years preventative services 3-5
  - In school LD/PBS services (working across home and school)
  - Transition support 14-25

These services should be underpinned by:

- Clear pathways for children with learning disabilities whose behaviours challenge – with the aim of improving outcomes, reducing behaviours that challenge and providing support locally.
- Key worker role with accountability and a clear job description
- Awareness raising/training for all staff
- PBS training for key professionals
- Multi-disciplinary working, training and planning
- Better information locally and nationally – directory, or database of evidence and good practice.
