

What Matters to Me

Consultation Template

For people leading consultations:

Purpose:

If you are leading a consultation and would like the responses to consider the lives of young people with severe or profound and multiple learning disabilities, we encourage you to include the text below.

Sample text:

To inform this consultation we would like responses to include views, preferences and experiences of young people with severe or profound and multiple learning disabilities who have no, or very limited, verbal communication.

Including this group may require non-traditional consultation activities and should be led, or closely informed, by people who know the person well, including family carers and the staff who work with them regularly. It may take longer and require additional funding.
